

A True Revolution

in Fuel Quality Management & Fuel Tank Maintenance.

- ✓ De-emulsifies and maintains pure fuel at all times
- ✓ Protects fuel tank from bacteria growth, corrosion and water accumulation
- ✓ Long term savings on maintenance and capital equipment
- ✓ Safe to handle and safe for the environment
- ✓ Stops the domino-effect of water damage from the tank through the fuel system to the engine
- ✓ Manages fuel-quality and fuel tank condition better than other solutions combined
